

## REMARKS

By this Amendment, Applicant is canceling Claims 52-103 and adding new Claims 104-118. Hence, Claims 51 and 104-118 are pending in this application.

New independent Claims 104 and 108 are supported by, for example, Embodiment 1 or Embodiment 2, in the present application. New independent Claims 111 and 115 are supported by, for example, Embodiment 3 in the present application.

In the new Claims 104-118, Applicant recites the terms "hole transport layer" and "electron transport layer." It is respectfully submitted that these terms are supported by the specification which uses the terms "hole conveying layer" and "electron conveying layer." Applicant believes that a better English translation of these terms from the priority Japanese application would be the term "transport layer." It is respectfully submitted that one of ordinary skill in the art would clearly understand that "transport layer" is a more proper English term for this layer than "conveying layer." Hence, no new matter is being added, and it is respectfully requested that these new claims be entered.

If any fee should be due for this amendment or the new claims, please charge our deposit account no. 50/1039.

Favorable consideration is earnestly solicited.

Date: February 11, 2008

Respectfully submitted,

/Mark J. Murphy/
